

WILL I GET ANY SIDE EFFECTS FROM THE CORONAVIRUS VACCINE?

You may have a sore arm, feel tired, have a headache or feel general aches and pains. These symptoms don't usually last for long and get better on their own quite quickly.

At your appointment you will be given information about the vaccine you have had, how to look for side effects and what to do if they happen.

All the latest information on immunisation can be found on the website:
